

Supply Chain Risk Leadership Council

February, 2009

Founded 2006 | <http://www.scrhc.com/>

Supply Chain Risk Management (SCRM)

The practice of managing the risk of any factor or event that can materially disrupt a supply chain whether within a single company or spread across multiple companies. The ultimate purpose of supply chain risk management is to enable cost avoidance, customer service, and market position

Supply Chain Risk Leadership Council

An industry council comprised of world class supply chain firms working together to develop and share supply chain risk management standards and best practices

SCRLC Objectives

- Develop industry standards for supply chain risk management (SCRM)
- Drive adoption of common SCRM standards, processes & metrics
- Expand overall awareness of SCRM and increase membership on the SCRLC

Council Structure

- The SCRLC is comprised of 6 Working Groups, plus a Governance Body
- Working Groups are focused on supply chain risk disciplines and best practices
 - Business Continuity Planning & Preparedness
 - Supply Chain Monitoring & Crisis Management
 - Manufacturing, Transportation and Logistics Resiliency
 - Materials (Supplier) Resiliency
 - Supply Chain Risk Quantification & Measurement
 - Supply Chain Security
